

Celcuity To Present at Upcoming Needham and Stifel Investor Conferences

April 4, 2024

MINNEAPOLIS, April 04, 2024 (GLOBE NEWSWIRE) -- Celcuity Inc. (Nasdaq: CELC), a clinical-stage biotechnology company pursuing development of targeted therapies for oncology, today announced that Brian Sullivan, Chief Executive Officer, and Co-founder of Celcuity, will present and be available for one-on-one investor meetings at the following investor conferences:

- A fireside chat at the 23rd Annual Needham Virtual Healthcare Conference at 2:15 p.m. ET on Thursday, April 11, 2024. A live webcast will be available using this weblink: <https://wsw.com/webcast/needham138/celc/2214082>; and
- A fireside chat at the Stifel 2024 Virtual Targeted Oncology Forum at 10:00 a.m. ET on Wednesday, April 17, 2024. A live webcast will be available using this weblink: <https://wsw.com/webcast/stifel92/celc/2056478>.

Alternatively, the live webcasts will be accessible from the Investors section of the company's website at <https://ir.celcuity.com/events-presentations/> with a replay available shortly after the live events.

About Celcuity

Celcuity is a clinical-stage biotechnology company focused on development of targeted therapies for treatment of multiple solid tumor indications. The company's lead therapeutic candidate is gedatolisib, a potent, pan-PI3K and mTOR inhibitor. Its mechanism of action and pharmacokinetic properties are highly differentiated from other currently approved and investigational therapies that target PI3K or mTOR alone or together. A Phase 3 clinical trial, VIKTORIA-1, evaluating gedatolisib in combination with fulvestrant with or without palbociclib in patients with HR+/HER2- advanced breast cancer is currently enrolling patients. More detailed information about the VIKTORIA-1 study can be found at [ClinicalTrials.gov](https://clinicaltrials.gov). A Phase 1b/2 clinical trial, CELC-G-201, evaluating gedatolisib in combination with darolutamide in patients with metastatic castration resistant prostate cancer, is enrolling patients. The company's CELsignia companion diagnostic platform is uniquely able to analyze live patient tumor cells to identify new groups of cancer patients likely to benefit from already approved targeted therapies. Further information about Celcuity can be found at www.celcuity.com. Follow us on [LinkedIn](#) and [Twitter](#).
